

ICRISAT

Denmark

Background

ICRISAT's efforts in sustainable agriculture, food security, natural resource management and environmental protection have been supported by the European Union and Danish partners. ICRISAT also has a long-standing partnership with the University of Copenhagen.

In May 2022, ICRISAT and the University of Copenhagen signed an MoU to build sustainable agri-food systems, contributing to the India-Denmark Green Strategic Partnership. This initiative will help accelerate research to build more resilient and sustainable agri-food systems.

Research Priorities

- Plant-based Protein
- One Crop Health
- Digital Agriculture and Agritech Innovations
- Precision Agriculture
- Climate Change and Food-based Cropping Systems
- Sustainable Agriculture
- Biotechnological Solutions for Crop Health.

Past Project

2009 – 2014: Domestication of *Jatropha curcas* for oil production on smallholder farms in the Sudano-Sahelian region with a focus on Mali in partnership with the University of Copenhagen.
